An update to your meals while you are in the hospital.

Over the next year we will be remodeling and expanding the kitchen to accommodate our growing number of patients.

**When:** Beginning July 2023  
**Why:** Fresh, hot food, faster

- When completed, we will be able to produce more than 650 meals per hour in our new kitchen. Decreased production time means faster delivery to your room with hot, fresh food.

**What changes will I see?**

- You will receive your breakfast and lunch with disposable plates, cups and utensils to reduce the need for washing and sanitizing dishes.  
- Freshly prepared chilled meal selections will be available for breakfast and lunch.  
- Prescribed diets and allergy information will continue to be available for your safety.  
- Hot food will be available at dinner only.

**What’s on the menu?**

Please use your phone and scan the QR code below for the menu that will be used for breakfast and lunch during construction. The menu shown here is our standard menu, and choices will be adjusted to account for dietary restrictions.

Thank you,

UK HealthCare Food and Nutrition Leadership Team
